1. Abstract

```java
package song;

public abstract class Artist {
    private final String name;
    private final String country;

    public Artist(String name, String country) {
        this.name = name;
        this.country = country;
    }

    public String getName() {
        return name;
    }

    public String getCountry() {
        return country;
    }

    public abstract String getArtistType();
}
```

2. Final

```java
package song;

public final class Band extends Artist {
    private final int memberCount;

    public Band(String bandName, String country, int memberCount) {
        super(bandName, country);
        this.memberCount = memberCount;
    }

    public int getMemberCount() {
        return memberCount;
    }

    @Override
    public final String getArtistType() {
        return "Band with " + this.memberCount + " members";
    }
}
```

```java
package song;

public final class SoloArtist extends Artist {
    private final String realName;

    public SoloArtist(String stageName, String country, String realName) {
        super(stageName, country);
        this.realName = realName;
    }

    public String getRealName() {
        return realName;
    }

    @Override
    public final String getArtistType() {
        return "Solo Artist (Real Name: " + this.realName + ")";
    }
}
```
